

Out of the problems below, find out in which equation both sides are equal.

$2 + 6 \underline{\hspace{1cm}} 3 + 4$

$5 - 2 \underline{\hspace{1cm}} 7 - 3$

$3 + 3 \underline{\hspace{1cm}} 4 + 1$

$9 - 4 \underline{\hspace{1cm}} 8 - 3$

Find at least one example of congruent shapes at Pioneer.

First draw three congruent shapes that have at least two lines of symmetry, and then draw two similar shapes that have at least one line of symmetry.
